Summary

Dynamic and innovation-driven AI Engineer and Full-Stack Developer with a proven record of building **production-ready AI/ML SaaS platforms** from scratch. Specializing in **Generative AI, Retrieval-Augmented Generation (RAG), LLMOps, MLOps**, and **cloud-native engineering**, with expertise spanning **FastAPI, React/Next.js, MLflow, Pinecone, Docker, and PostgreSQL**.

Hands-on experience delivering **enterprise-grade, multimodal, multilingual AI products** that combine **explainable AI, real-time streaming UIs, automated pipelines**, and modern cloud deployment practices. Adept at turning business problems into scalable, revenue-focused technical solutions. Committed to continuous learning and staying ahead of AI trends, I thrive in fast-paced environments where complex engineering meets real-world problem-solving.

Looking to drive AI innovation at scale, contributing to high-impact, business-critical projects.

Skills

Languages: Python, C, C++, HTML, CSS, SQL, JavaScript, TypeScript

Frameworks and Libraries: FastAPI, Flask, React.js, Next.js, TailwindCSS, Scikit-Learn, XGBoost, Pandas, NumPy, TensorFlow, LangChain, MLflow, Airflow, Matplotlib, Seaborn, Power BI

Tools & Platforms: Git, GitHub, Docker, Docker Compose, Google Cloud Platform (GCP), Google Cloud Storage (GCS), GitHub Actions (CI/CD)

Soft Skills: Strong Communication, Team Leadership, Problem-Solving, Analytical Thinking, Rapid Learning, Adaptability

Education

Vidyavardhini's College of Engineering and Technology Mumbai, India

Nov 2022 – May 2026

Bachelor of Engineering - Artificial Intelligence & Data Science

- **Coursework:** Courses: Operating Systems, Data Structures, Algorithms, Database (MySQL), Statistics, Probability

Experience

Data Analyst

Remote

Oasis Infobyte

Feb 2024 – Mar 2024

- **Data Collection & Cleaning:** Gathered and cleaned data for analysis using SQL queries.
- **Data Analysis:** Analyzed data using Python, SQL, and Excel; conducted statistical analysis and A/B testing.
- **Reporting and Visualization:** Created visual reports and dashboards with Power BI.

Projects

ChurnGenie: AI-Powered Customer Retention Platform

[GitHub Repository](#) 

- Tech: Python, FastAPI, XGBoost, MLflow, Airflow, Next.js, Docker, GenAI (Qwen-32B) meetings with other users.
- Built a production-grade ML SaaS platform predicting and preventing customer churn.
- Integrated automated retraining pipelines (MLOps), explainability via GenAI, and a business-friendly dashboard.
- Cloud-native, containerized, CI/CD-ready.

AutoRAG: Multimodal, Multilingual Retrieval-Augmented Generation SaaS

[GitHub Repository](#) 

- Tech: FastAPI, React, Pinecone, Qwen3-32b, LLaMA 3.3-70b, Whisper, GCS, Docker
- Developed a scalable SaaS RAG platform supporting text, image (OCR), and voice input with multilingual retrieval and streaming chat.
- Integrated Google Drive upload, streaming UI, and follow-up suggestion generation.
- Fully modular, production-ready with real-time chat and customizable prompts.

AutoRedTeam.AI – LLM Jailbreak And Security Testing Platform

[GitHub Repository](#) 

- Tech: Python, React, LLaMA APIs, Matplotlib
- Automated platform to red-team LLMs for jailbreaks, prompt injections, and PII leaks.
- Categorized failure modes, generated security reports, and visualized vulnerability metrics.

Resumate: AI-Based Resume Screening

[GitHub Repository](#) 

- Tech: React.js, Flask, LLaMA 3.7B, XGBoost, NLP, Speech APIs
- Built AI-driven HR automation system for semantic resume analysis and salary prediction.
- Implemented automated email notifications and chatbot-based candidate interaction using voice and text.
- Achieved 80–85% accuracy in salary prediction.
